4. Acknowledgments **4**
4.1.1. To Myself: 4
4.1.2. To Coffee, Vape and Cold Water: 4
4.1.3. To Render, Github and ClaudeCode: 4
4.1.4. To Open-Source Projects 4

StayHub: The Smart Way to Book, Host and manage Stays

1. **Technologies**
   - 1.1. **Angular**
   - 1.2. **Spring Boot**
   - 1.3. **MailTrap**
   - 1.4. **MariaDB (Development & Testing)**
   - 1.5. **PostgreSQL (Production)**
   - 1.6. **Docker**
   - 1.7. **Render**
   - 1.8. **GitHub Pages**
   - 1.9. **Angular-cli-ghpages**
2. **Live Demo**
   - 2.1. **Frontend**
     - 2.1.1. **https://estebangmz666.github.io/StayHub**
   - 2.2. **Backend**
     - 2.2.1. **https://stayhub-e31h.onrender.com**
3. **Requirements CheckList**

ID	Requirement	Evidence

0	Source Code (Backend + Frontend)	https://github.com/Estebangmz666/StayHub/tree/master/stayhub-api https://github.com/Estebangmz666/StayHub/tree/master/stayhub-front
1	Complete Documentation	https://github.com/Estebangmz666/StayHub/tree/master/documentation
2	Cloud Deployment Documentation	https://github.com/Estebangmz666/StayHub/blob/master/documentation/Implementation%20Process%20Report%20-%20StayHub.pdf

4. Acknowledgments

4.1. This project would not have been possible without the unwavering support of several key contributors:

4.1.1. To Myself:

4.1.1.1. For the countless late-night debugging sessions, relentless perseverance, and turning "it works on my machine" into a production-ready reality. It means a huge improvement into my developer roadmap, from JavaFX to SpringBoot industry software.

4.1.2. To Coffee, Vape and Cold Water:

4.1.2.1. The fuel that powered through 3 AM deploys and kept the neurons firing when Render decided to redeploy for the 17th time.

4.1.3. To Render, Github and ClaudeCode:

4.1.3.1. Silent heroes that hosted, versioned, and answered the unanswerable.

4.1.4. To Open-Source Projects

4.1.4.1. Those unpaid persons who work hard every day, keeping many libraries and frameworks up to date, free and high quality.

StayHub is live. Sanity is optional.
